

YALE PRFDHR SPRING 2020 SEMINAR SERIES PRESENTS

EARLY CHILDHOOD DEVELOPMENT IN THE SYRIAN AND ROHINGYA REFUGEE RESPONSE REGIONS

Early childhood development (ECD) programming, although critical for human development and learning, has been overlooked beyond the basics of food, shelter and survival in humanitarian contexts.

Professor Hiro Yoshikawa and Dr. Alice Wuermli report on current and planned research in initiatives to provide and evaluate ECD services in regions with Syrian and Rohingya refugee flows - which are currently two of the largest flows in the world. This research represents partnerships between Sesame Workshop, the International Rescue Committee, BRAC, and (as the research and evaluation partner) NYU's Global TIES for Children Center.

PROFESSOR HIRO YOSHIKAWA

Courtney Sale Ross Professor of Globalization & Education at NYU Steinhardt and Co-Director of the Global TIES for Child Center at NYU

DR. ALICE WUERMLI

Associate Director of the Low-Income Countries Program at NYU
