Announcements

7th Annual Smilow Network Research Summit

I was pleased to share in the enthusiasm of our Care Center Network colleagues at our annual Smilow Network meeting earlier this week. We had over 70 physicians attend from our 15 Care Center Network sites to hear updates on clinical research from **Roy Decker, MD, PhD**, **Neal Fischbach, MD**, and **Joyce Tull, MSN, RN**, and **Anne Chiang, MD, PhD**, and to participate in working breakout sessions to improve screening, access, accrual, and DART alignment.

In addition, awards were presented to **Diane Eannotti, RN, BSN, CCRC**, Clinical Research Nurse at our Trumbull and Fairfield Care Centers; **Diana Irizarry, RN, CCRP**, Clinical Research Nurse at our Waterbury Care Center; **Patricia Brand**, Clinical Research Coordinator at our Guilford Care Center; and **Jannat Gill, BDS, MPH, CCRP**, Clinical Research Coordinator at our Waterford Care Center. Each of these employees were recognized for their strong dedication to our clinical research mission during the last year during continued growth in clinical trial accruals from our Care Centers. Special thanks to **Kathleen Uscinski**, **Jessica Goepfert**, and **Carl Brown** for their leadership of the Care Center CTO team. Thank you to all of the Care Center Research staff for their passion and exceptional commitment to our patients!

CoC Accreditation

I am proud to announce that we were awarded a 3-year Accreditation with Commendation from the Commission on Cancer, a program of the American College of Surgeons. This unique honor is a testament of the outstanding quality care and commitment to innovation in clinical research the entire Smilow Cancer Hospital and Yale Cancer Center team advances throughout all of our clinical programs across our Park Street Campus and our Care Centers. I would like to thank our Cancer Committee, chaired by **Harold Tara, Jr., MD**, the work of our Tumor Registrars, led by **Teresita Vega**, and the longstanding commitment of **David Fischer, MD**, for their combined work on the extraordinary reaccreditation process.

Joint Commission Survey

Last week, Yale New Haven Hospital hosted 14 surveyors for our triennial survey, which included Smilow Cancer Hospital and our Care Centers. The surveyors were extremely complimentary and often commented that we had best practices that should be shared nationally. The extraordinary care our teams deliver was demonstrated and validated throughout the week. I want to thank **Kim Slusser, MSN, RN, CHPN, NEA-BC**, and her team for her leadership through this process, and our entire team for their efforts each and every day on behalf of our patients. Your dedication shined during the Joint Commission visit, just as it does every day.

Notables

Laura Morrison, MD, Associate Professor of Medicine, has been elected to the **Board of Directors** for the **American Academy of Hospice and Palliative Medicine (AAHPM)**.

Jennifer Kapo, MD, Chief of Palliative Care, and **Melissa Weimer, DO**, Assistant Professor of Medicine, recently presented at the **Association for Multidisciplinary Education and Research in Substance Use and Addiction (AMERSA)** National Meeting in Boston, MA on *Survivor Story: Beating Cancer and Tapering Opioids*.

Roy S. Herbst, MD, PhD, presented the **Waun Ki Hong Memorial Lecture** at the AACR-Korean Cancer Association Joint Workshop on Precision Medicine last week on *Personalized Therapy for Advanced Non-Small Cell Lung Cancer: From BATTLE to Immunotherapy*.

Congratulations to **Hope Serra** who was selected as the **Ambulatory Care Associate Circle of Care Award** recipient for the Yale New Haven Health System. Hope works in the Smilow Surgical Specialty Clinic at the Park Avenue Medical Center and was one of two ACAs awarded this inaugural honor at the Care Associates celebration for the Health System on Monday afternoon.

Ena Williams, Hope Serra, and Mary Ellen Kosturko

Monica Fradkin, MPH, BSN, CNML, and **Lisa Shomsky, MBA, BSN, CNML**, have been promoted to **Smilow Regional Directors**. In their new roles, Monica and Lisa will focus on strategic planning, business development, and strengthening programs and services by working with leadership of System Delivery Networks, Smilow Cancer Hospital and Yale Medicine. Monica will continue to lead the Smilow Care Centers in Torrington, Waterbury, Derby, Orange, North Haven, Guilford and Old Saybrook. In addition, she will work with local leadership to enhance cancer services within L+M Healthcare, which includes the Waterford and Westerly Care Centers. Lisa will continue her responsibility for Smilow at

Bridgeport oncology services, including the care centers at Trumbull and Fairfield, the breast centers and surgical specialties. In addition, she will assume leadership for the Smilow Cancer Hospital Program at Greenwich working with local leaders to focus on program expansion and the development of a new facility on that campus.

Cancer Signaling Networks is proud to welcome **Shalin Kothari, MD**, Assistant Professor of Medicine (Hematology). Dr. Kothari is currently working in the Katz Laboratory as a translational scientist, in addition caring for patients with lymphoma at Smilow Cancer Hospital and attending on the inpatient service. Broadly, his research involves the following areas of Mantle Cell Lymphoma (MCL): (1) interpretation of genomic data in the context of a response and resistance to targeted therapies, (2) development of experimental strategies to circumvent resistance after analysis of such data, and (3) collaborating with local and national experts towards execution of multi-faceted translational research projects. Dr. Kothari's career goal is to use clinical skills and basic science knowledge to answer scientific questions focused on mechanistic understanding of lymphoma therapeutics, specifically for MCL, which has a large unmet need.

Last week, Saint Francis Hospital and Smilow Cancer Hospital hosted our 4th annual **Hematologic Malignancies Symposium** at the Connecticut Convention Center.

We were proud to host the 13th annual Paul Calabresi Memorial Lecture today during Yale Cancer Center Grand Rounds with Dr. Otis Brawley, the Bloomberg Distinguished Professor of Oncology and Epidemiology at Johns Hopkins University. Dr. Brawley focused his lecture on trends in cancer diagnosis and treatment and socioeconomic disparities.

Research Highlight

"There is a desperate need for new therapies to improve the care of patients with advanced pancreatic cancer" - Dr. Mandar Muzumdar. In honor of pancreatic cancer awareness month, read how the Muzumdar Lab is leading research to treat the disease.

Yale study finds 'hyperhotspots' that could predict skin cancer risk

New research by Yale Cancer Center scientists reports the discovery of "hyperhotspots" in the human genome, locations that are up to 170-times more sensitive to ultraviolet radiation (UV) from sunlight compared to the genome average. Exposure to UV radiation is the major cause of skin cancer. Screening the hyperhotspots could offer a new means of predicting a person's skin cancer risk. The study was published in the November edition of *Proceedings of the National Academy of Sciences*.

"These are 100 times more sensitive than other sites in the genome," said lead author Douglas Brash, senior research scientist in therapeutic radiology and dermatology and a member of the Yale Cancer Center.

Employee Profile: Susan Beno

Ever since she was an undergrad, Susan Beno, a Licensed Clinical Social Worker our Breast Center, has been interested in what motivates people and her goal has always been to work with oncology patients. After working two years in the Breast Center, she feels very fortunate to be working with this patient population and their families.

Not only does Susan aim to meet with newly diagnosed patients and assess their needs, but she follows them throughout treatment and as they transition into survivorship care. She uses her training in cognitive-behavioral interventions to help patients cope with the emotional impact of a cancer diagnosis.

"Every individual is unique in how they are impacted by a cancer diagnosis. For some, the diagnosis itself causes the

Meet Dr. Neal Fischbach, a medical oncologist who cares for patients at our Smilow Cancer Hospital Care Center in Trumbull. "Our Care Center model allows me to provide care for our patients where we live while leveraging all the resources of Smilow Cancer

most anxiety, but for others it is talking with family, and practical issues like childcare," said Susan. "Distress screenings and depression screening via an iPad is something that was piloted by the Breast Center and can be vital to identifying patients who may need extra support. If we can identify the early signs of depression, for example, we can intervene sooner and work to mitigate the symptoms in a healthy way."

Bonnie Indeck, LCSW, Manager of Oncology Social Work at Smilow Cancer Hospital, commented, "It is a pleasure to have Susan on the Oncology Social Work team - she has honed her clinical skills and is very easy to talk with, enabling patients and families to share their innermost thoughts with her. Susan is kind and compassionate and helps to improve the quality of life of those she works with."

YCC #OOTBThanks: Amelea Lowery

YCC #OUTOFTHEBLUETHANKS recently recognized Amelea Lowery, a Senior Administrative Assistant at Yale Cancer Center. After attending a recent session of the "Creating an Inclusive Workplace for Transgender and Non-binary Colleagues" training course offered at Yale, she put what she learned into action right away. Amelea applied the takeaway from this course to a specific and easily solvable issue she identified on a series of instruction documents she encountered in her role supporting the recruitment efforts at the cancer center. Furthermore, she then took steps to bring that issue to the attention of the appropriate people in the department and offered to help amend the documents as necessary to be more inclusive. The necessary changes were
