A Thoughtful Approach in the Fight Against Brain Tumors: Personalizing Care for the Best Outcomes

Wednesday, June 6, 2018

5:30 PM - Registration and Appetizers

6:00 PM - Program

Please join us for an evening of discussion with two of our renowned brain tumor experts for an understanding of the most effective and comprehensive ways to manage and treat brain tumors. We will explore our comprehensive, patient-focused strategies using current state-of-the-art surgical techniques and clinical trials, as well as cutting-edge additions, including targeting the underlying genetic abnormalities in tumors with advanced precision medicine. Finally, we will focus on ways we can help optimize support for patients and their loved ones as they undergo diagnosis and treatment.

The educational seminar will feature:

Jennifer Moliterno, MD, FAANS, Neurosurgeon

Zachary A. Corbin, MD, Neuro-oncologist

WHERE

55 Park Street Auditorium
New Haven, CT

Free parking is available
in the Air Rights Garage.

This event is free and
open to the public, but
registration is required.
