**“Scientific Integrity and Meta-Research in  
Environmental Health Sciences”**

**Joshua D. Wallach, M.S., Ph.D.**  
**Center for Outcomes Research & Evaluation (CORE)**  
**Yale University**

**Bio:** Joshua Wallach joined the CORE CRIT (Collaboration for Research Integrity and Transparency) team after completing his PhD in Epidemiology and Clinical Research at Stanford University. His dissertation, "Reproducible Research Practices, Scientific Transparency, and Subgroup Claims: A Meta-Research Dissertation," was completed under Dr. John Ioannidis, and committee members Drs. Kristin Sainani, Lorene Nelson, Sanjay Basu, and Lloyd Minor. While working for the Meta-Research Innovation Center at Stanford (METRICS), Dr. Wallach focused on evaluating reproducible research practices, scientific transparency, P-values, risk prediction models, and the validity of subgroup claims made in randomized controlled trials. At Stanford, Dr. Wallach also worked as a graduate teaching affiliate for the department of Human Biology.

**12:00 p.m. Tuesday, September 12, 2017**
