

Are you between the ages of 12 and 30, and have you noticed any recent changes in your thinking, behavior, or experiences? If so, you may be eligible to participate in a study.

Are you experiencing confusion about what's real or imaginary? Do you feel like you can't control your own thoughts or have difficulty communicating clearly? You may also be experiencing symptoms such as suspicion, paranoia, or hallucinations.

We are conducting a study to better understand these experiences and how to treat them. As a participant, you will be compensated for your time.

If you're interested in participating or have any questions, please reach out to the PRIME CLINIC team by phone at 203-200-8997 or email at Prime.clinic@yale.edu. We're here to support you in your mental health journey.
