"Anything for Us, Should Include Us": A Patient Engaged Approach to Advance Racial Equity in Cancer Research Participation

Marjory Charlot, MD, MPH, MSc
Assistant Professor of Medicine; Assistant Director of Community Outreach and Engagement, University of North Carolina at Chapel Hill School of Medicine, UNC Lineberger Comprehensive Cancer Center

Needs: NAM recommends that all patients have access to high quality cancer clinical trials. However, patients of color, particularly people who identify as Black or African American are less likely to be enrolled in cancer clinical trials.

Objectives: Overview of racial inequities in cancer clinical trial participation. Discuss potential solutions to support racial equity in clinical trials. Discuss how patient engaged research can be used as a tailored approach to support racial equity in cancer clinical trial participation.
