Ariel Chao

MPH Candidate

Department of Biostatistics

Yale School of Public Health

Ariel is a first-year student at Yale School of Public Health and a MPH candidate in the Biostatistics Department. She is currently working on the mortality under early access to antiretroviral therapy versus national standard of care.

Her research interests include:

- **Survival analysis and its application in clinical trials, especially the inference on the success of new treatments, medical products, and policies,**
- **Outcomes research, assessing the quality of care and safety of patients.**
