LEAN Study: Women with breast cancer staying healthy and active during the Covid-19 crisis

Needs: Discuss if there are modifiable factors associated with cancer prevention and control, and an approach to lowering the risk of developing or dying of breast cancer.

Objectives: Increase knowledge related to benefits of exercise and healthy eating for cancer prevention and control and understand mechanisms mediating the association between obesity and cancer.

My Pathway: Redesigning Clinical Decision Support to Empower Patients

Needs: ASCO has highlighted the need for the patient’s perspective to be included in clinical pathways.

Objectives: Discuss the rationale for clinical pathways and for shared decision making. Share insights into patient and caregiver perspectives.
