"Prenatal intervention for GU anomalies: outcomes and dilemmas"

The CME activity is designed to cover a broad range of clinical and research urologic topics which audience members will either have exposure to in their own urologic practices, as well as being generalizable to improve overall understanding and expansive to common and evolving urologic topics. The conference will also cover associated medical issues that many physicians and urologists are faced with as they manage complicated patients in a multidisciplinary community of physicians

For CME credits, please text code 35380 to 203.442.9435

Faculty:

Vijaya M. Vemulakonda, JD, MD
Professor of Pediatric Urology
Residency Program Director
Director of Research
University of Colorado School of Medicine

Program Goal:

- To discuss options for prenatal intervention in posterior urethral valves, Eagle Barrett syndrome, and in utero renal failure
- 2. To describe prenatal and early postnatal outcomes of in utero interventions
- 3. To understand current ethical and legal dilemmas in the prenatal management of these conditions

Target Audience: Urology
