

THE PROGRAM  
FOR HUMANITIES IN MEDICINE

INVITES YOU TO A LECTURE

THE ART OF ILLNESS

ALICE FLAHERTY, MD, PHD  
NEUROSCIENTIST AUTHOR

HARVARD MEDICAL SCHOOL

Dr Flaherty is at Massachusetts General Hospital where she heads the movement disorder clinic. Her love of language is married with her love of science, and she combines the two, as in her book *The Midnight Disease: The Drive to Write, Writer's Block, and the Creative Brain*. Her work is erudite, poetic, and playful, while at the same time offering insightful and probing looks into the cross-over between brain science and art.

**BEAUMONT ROOM      333 CEDAR STREET**
