

Kavli Institute for Neuroscience

Research in Progress Summer Series

July 30 - August 20, 2020

Thursdays
12-1pm
via Zoom

July 30th

Erdem Karatekin, PhD

Dynamics of membrane tension and synaptic vesicle recycling

Jamie Jeanne, PhD

Synaptic mechanisms of flexible behavior

August 6th

Rui Chang, PhD

From connectome to transcriptome: developing a high-throughput Single-Neuron transcriptome Analysis based on Projections (SNAP-seq)

Qiancheng Zhao, PhD

Molecular and functional dissection of the heart-to-brain circuits

August 13th

Marcus Tuttle, PhD

Phase transitions of neurodegenerative proteins analyzed by solid-state NMR

Anirvan Nandy, PhD

A paradigm shift in the study of complex social cognition

August 20th

Huriye Atilgan, PhD

Mapping the cortical substrate for value-based decisions in mice

Phil Corlett, PhD

Understanding self-deception
