# Yale Pathology

## Pathology Grand Rounds

Thursday, October 21st 12:30-1:30pm

Hosted by: Manju Prasad, MD

**Ian Alexander Cree, BSc (Hons), MB, ChB, PhD, FRCPath, ALS**

Head, Section of Evidence Synthesis and Classification; International Agency for Research on Cancer; World Health Organization

*The process and challenges of the WHO Books*

**Needs:** The WHO Classification of Tumours underpins the diagnosis of all cancers, worldwide, and is an essential tool for all those engaged in cancer diagnosis, management or research – often with them knowing it. There is a need for pathologists and others involved to understand the governance of the process used to produce the classification, and the challenges involved. Incorporation of results from multiple disciplines is a necessity and the vast volume of data to be included poses its own challenge.

**Objectives:** Understand the importance of tumour classification to patients, their doctors and researchers; Understand the methods used to produce the WHO Classification of Tumours; Be able to discuss the needs of the classification and understand how to contribute to it.
