Announcements

YCC Hosts Cancer Student Interest Group

Yale Cancer Center scientists and physicians hosted members of Yale School of Medicine's Cancer Student Interest Group for a "Speed Dating" style event earlier this week, which gave the students time to briefly meet several members of Yale Cancer Center. Each interaction provided the students time to learn about different areas of cancer research and patient care, and exposed them to new opportunities. Thank you to all of the faculty who participated!

Bladder Cancer CME Dinner

Yale Urology, Smilow Cancer Hospital, and Yale Cancer Center will host a CME dinner highlighting advances in the medical and surgical treatment of bladder cancer on Wednesday, March 13 in Southport.

Notables

The Yale Cancer Center **Radiotherapy and Radiobiology Research Program** is proud to welcome **Christopher Tien, PhD**. Dr. Tien is a Clinical Assistant Professor in the Department of Therapeutic Radiology and lead of the physics brachytherapy division. Dr. Tien works primarily with Shari Damast, MD and Melissa Young, MD, PhD on gynecological brachytherapy.

His clinical responsibilities for brachytherapy include treatment planning for patients and quality assurance.

Dr. Tien's research concentrates on clinical and translational research for the brachytherapy program. His most recent endeavor was the implementation of a model-based dose calculation algorithm and the commissioning process, which was presented at the plenary session of the American Brachytherapy Society's annual meeting. The work won the Judith Stitt award, which is presented to the best physics submission.

Canhua Xiao, PhD
has been appointed to
the **Cancer
Prevention and
Control Research
Program.**

Dr. Xiao is an Associate Professor in the School of Nursing. The focus of Dr. Xiao's scholarship has been cancer-related psycho-neurological symptoms, their inflammatory mechanisms, and patient-reported outcomes. Her goal is to improve the quality of life and long-term survival of patients with cancer through multidisciplinary research and the development of evidence-based interventions. Dr. Xiao's recent work has shown associations between cancer-related fatigue and inflammation at the peripheral protein and mRNA gene expression levels.

Her funded research will further examine the association between persistent fatigue and long-lasting inflammation that may involve epigenetic changes secondary to cancer and its treatment. Additionally, Dr. Xiao's recent pilot work indicates that increased physical activity levels may reduce inflammation and consequently cancer-related fatigue.

Yale Cancer Center is proud to welcome Ye Grace Chen, PhD and Gloria Huang, MD to its membership. Dr. Chen is an Associate Research Scientist in the Department of Immunobiology at Yale. Her research focuses on RNA biology and its implications for our understanding of cellular processes and abilities to harness novel tools in the prevention and treatment of cancer.

Dr. Huang is an Associate Professor in the Department of Obstetrics, Gynecology and Reproductive Sciences and a board-certified gynecologic oncologist. Her laboratory studies how genetic alterations and the host microenvironment influence cancer progression and response to treatment.

The Integrative Medicine (IM) Program at Smilow Cancer Hospital helps to complement cancer treatment and to address the serious physical and emotional symptoms often experienced by patients before, during, and after therapy treatment. As the only full-time licensed massage therapist, Gisela Boxleitner is also the coordinator of the IM Program, and provides direct patient care. In her role as coordinator, Gisela collaborates daily with the IM team to assure the best service delivery to all patients. Gisela also participates in several programs, committees, and activities outside of the IM Program.

In 1999, after operating her own massage business for twenty years, Gisela started as the first massage therapist on staff at YNHH. In 2011, she began working full time and took on more responsibilities as coordinator of the program, such as starting an internship for massage therapy, coordinating volunteers, organizing various classes (Qigong, Tia Chi), and establishing the Smilow Wellness Workshops. However, her main focus and passion remains caring for patients.

"Smilow is unique in the fact that these services are offered for free. We are a small team, but we all work together to make sure patients are offered these vital services. As an inner city hospital, we work with patients that may have never been exposed to our services. To be able to offer that to someone when they are going through the most stressful time of their life, is a real blessing," said Gisela.

Dr. Gary Soffer, Assistant Professor of Clinical Pediatrics, sees patients who have been referred for a consultation in Integrative Medicine. He commented, "Gisela's steadfast commitment to Integrative Medicine at Smilow has been paramount to its success. She is devoted to bringing services like massage, Tai Chi, meditation, and yoga to all of our patients in spite of their resources. Her work has allowed patients to add a depth and sense of meaning to what can otherwise be a harrowing experience."

Welcome to Yale Cancer Center

Ye Grace Chen and Gloria Huang

Thank you to Dr. Elan Gorshein for a fantastic presentation for the Shoreline Eldercare Alliance (SEA) yesterday on cancer care and treatment and the mission of Smilow Cancer Hospital and

Linda Penn, BSN, RN, Manager for Integrative Medicine and the Boutique at Smilow, commented, "Gisela's seemingly endless energy, commitment to sharing her skills, and passion to give patients the best possible care make her an obvious choice to receive this recognition. Gisela's compassionate care makes a difference at Smilow every day!"

#OOTBThanks

YCC #OUTOFTHEBLUETHANKS recently recognized **Stephen Baeder**, a Clinical Research Assistant in the Clinical Trials Office at Yale Cancer Center. When a new colleague started on his team, Stephen took the time to make sure she was trained on various tasks associated with her position as well as having her shadow him any time he worked on a task she had not yet seen. Stephen also took the initiative to create a packet of training materials to make sure she would be able to come up to speed as quickly as possible. There are many occasions where Stephen goes above and beyond, but this is just one example of his commitment to his team. Thank you, Stephen!

Yale Cancer Center's #OUTOFTHEBLUETHANKS program is a staff recognition initiative to show appreciation to employees who have exemplified an above-and-beyond effort or an outstanding contribution to the team. All nominations should be submitted to the Director's Office c/o Anna Raso.
