The Clinical and Translational Science Award (CTSA) of the University of Pennsylvania is located within the Institute of Translational Medicine and Therapeutics (ITMAT). Since its inception in 2005, ITMAT continuously integrates innovative medical and graduate education across the full spectrum of both clinical and basic research disciplines consistent with the mission of the National Center for Advancing Translational Sciences (NCATS).

The Visiting Scholars Program is a working group within the Center for Leading Innovation and Collaboration (CLIC). With its administrative home at the University of Rochester, CLIC provides a structure for communication and collaboration at all levels for all CTSA program hubs.
