

David Bartel, Ph.D.  
Whitehead Institute  
Department of Biology  
MIT

## MicroRNAs, mRNAs, and poly(A) tails

The Bartel lab studies the regulation of mRNA translation and decay. Topics potentially covered in this seminar include microRNAs and their regulatory effects, the dynamic relationship between poly(A)-tail length and translational efficiency, and the global analyses of RNA G-quadruplex folding

Monday, October 24, 2016

BASS 305

3:45 Tea 4:00 Seminar

Host: Matthew Simon

*Co-sponsored by: Yale Center for RNA Science and Medicine*

*Supported by the Mrs. Hepsa Ely Silliman Memorial Fund*
