Introduction to Biomedical Data Science and Health Informatics

June 8-12, 2020

Time: 9:00 a.m. to 5:00 p.m.
Level: Beginner

Early Bird Registration: $300.00 Ends April 16th
Location: Yale Campus, New Haven
Register here: https://yale-biomedical-data-course-2020.eventbrite.com

A one-week summer course to offer basic biomedical data science knowledge and health informatics skills. Each day will consist of lectures and labs.

Learning objectives:

- Understand a variety of software packages and select the appropriate methods to solve data problems in the clinical, health and biomedical domains.

- Apply the fundamentals of computing to integrate the aforementioned packages to address various sources of data and information uncertainty across clinical health and biomedical domains.

- Gain a familiarity with data science and informatics resources to develop individual and collaborative research at Yale.
