**“Treatment-as-prevention and the elusive end of
AIDS in South Africa”**

Global HIV treatment policy has shifted from universal access to universal test-and-treat (UTT). I will present new data from an evaluation of the 2016 roll out of UTT in South Africa using a national HIV cohort we developed. I will then discuss the limits of supply side approaches and why efforts to increase demand for early treatment are needed.

12:00 PM Thursday, December 5, 2019

47 College Street, Room 106B

Host: G. Gonsalves
