

Yale SCHOOL OF MEDICINE

GENETICS DEPARTMENT SEMINAR SERIES

Leveraging (mis)fortunes of the genome to understand cardiovascular disease

Dr. Stitzel will discuss how naturally occurring human genetic variation can be leveraged in identifying and validating novel therapeutic targets and pathways for the treatment of cardiovascular disease.

Nathan Stitzel, M.D., Ph.D.

Associate Professor of Medicine and Genetics;
Director, Center for Cardiovascular Genetics
Washington University School of Medicine

Host: Ira Hall, PhD

Professor of Genetics; Director, Yale Center for Genomic Health

Tuesday, November 30th, 2021

11:30am - 12:30pm
