“Early Data on ‘Treat All’ Guideline Implementation for HIV/AIDS, and Developing Research Priorities to Inform Future Implementation”

Denis Nash, PhD, MPH
Distinguished Professor,
Epidemiology and Biostatistics
Executive Director, CUNY Institute for
Implementation Science in Population Health

ABSTRACT

Most national programs around the world have now adopted ‘Treat All’ policies for HIV/AIDS. This talk will examine recent evidence on both the implementation/uptake and the impact of national ‘Treat All’ policies for HIV/AIDS. It will also review a recently developed consensus statement on research priorities to inform ‘Treat All’ implementation in Sub-Saharan Africa.

Thursday, November 1, 2018
3:00 - 4:00 p.m.

47 College Street, Classroom 106A

Reception from 4:00 – 5:00 p.m. in the student lounge.

Please RSVP to evelyn.aviles-dejesus@yale.edu

Dr. Nash is Professor of Epidemiology at the CUNY School of Public Health. He has worked at the forefront of the emerging field of implementation science, and is the founding Executive Director of CUNY’s new interdisciplinary Institute for Implementation Science in Population Health. He is the Associate Director of the Einstein-Rockefeller-CUNY Center for AIDS Research (CFAR) and Director the Implementation Science and Health Outcomes Core of the HIV Center for Clinical and Behavioral Studies at Columbia University. His central interests include infectious diseases, the field of public health surveillance and the use of public health surveillance data to conduct rigorous assessments of programmatic effectiveness and the impact of policies on health. He has worked extensively in domestic and international settings conducting large-scale, ‘real-world’ epidemiologic studies examining key outcomes among persons with HIV infection.
