

Kavli Workshop: Tuesday, March 25, 2014
09:00 AM to 12:00 Noon

Location: Brady Auditorium – B131

Multicellular Monitoring and Manipulation

<i>Time</i>	<i>Speaker</i>
09:00-09:30 AM	Vincent Pieribone, PhD <i>Probes for Imaging Neuronal Electrical Activity</i>
09:30-10:00 AM	Michael Nitabach, PhD, JD <i>Genetically Targeted Optical Electrophysiology in Intact Drosophila Brain</i>
10:00-10:30 AM	Michael Crair, PhD <i>Mesoscopic Imaging of Spontaneous Activity in the Neonatal Cortex of Mice</i>
10:30-11:00 AM	Jessica Cardin, PhD <i>Dissecting Circuits in Vivo: Dense Recordings and Optical Tagging in Visual Cortex</i>
11:00-11:30 AM	David McCormick, PhD <i>Multineuronal Signals are Strongly Influenced by State</i>
