

## A Practical Guide to Recovery-Oriented Practice: Tools for Transforming Mental Health Care

Larry Davidson, Janis Tondora, Martha Staeheli Lawless, Maria J. O'Connell and Michael Rowe

2008 272 pp.; 5 halftones, 20 line illus.  
ISBN13: 978-0-19-530477-0 paper \$39.95

“. . . a profoundly respectful text, based upon the assumption that people with severe mental illness should rightfully have control over their own lives, supported by others. . . Everyone concerned with mental illness will find this an invaluable treasure chest of challenging, practical, and transformational ideas.”—**Graham Thornicroft, FRCP, PhD**, Professor of Community Psychiatry, Institute of Psychiatry, King's College London

“This may be the best of a recent spate of books on recovery. Philosophy and phenomenology tempered by pragmatism— William James would be delighted.”—**Robert E. Drake, MD, PhD**, Professor of Psychiatry and of Community and Family Medicine, Dartmouth Medical School

“Recovery is the vision of our era. . . In this book, Davidson and colleagues capture their amazing journey with recovery. They demonstrate the impact of recovery on major system change. . . In the process, they prescribe steps to make this vision a reality.”—**Patrick Corrigan, PsyD**, Professor, Rehabilitation Psychology, Institute of Psychology, Illinois Institute of Technology

“*A Practical Guide to Recovery Oriented Practice* is a welcome voice of reason in a maelstrom of fears, hopes, and confusion about transformation to a recovery-based, consumer-directed mental health system. With the authors' guidance and support, all of us can now take a deep cleansing breath, rethink mental illness and care, and push open the door to embrace a post-mentalistic system of care.” —**Jean Campbell, PhD**, Research Associate Professor in Psychiatry, Missouri Institute of Mental Health, University of Missouri-Columbia School of Medicine
