Vaccination is commonly recognized as one of the most cost-effective global health investments. Strong, high-performing national immunization teams are critical for the effective and efficient management of immunization programs toward the achievement of global health targets, including the Sustainable Development Goals. To meet this need, GHLI has teamed up PATH, the University of Yaoundé (Cameroon), and the University of Global Health Equity (Rwanda) to launch the EPI Leadership and Management Program (EPI LAMP), a practical and comprehensive leadership development program for national immunization teams. EPI LAMP represents a flagship investment by Gavi, the Vaccine Alliance in the systems and capacities needed to achieve immunization program targets at scale.

Please join us as we present the results of the first year of EPI LAMP, where we engaged teams from India, the Gambia, Liberia, Rwanda, and Zambia. We will be joined on campus by colleagues from PATH and University of Yaoundé. Following an overview of the program and presentation of results, we will open the floor for discussion and networking.

Wednesday, April 17, 2019
12:00 - 1:00 PM (light lunch provided)
Yale School of Public Health
60 College Street, Room 216
