TARGET AUDIENCE

Attending physicians, house staff, fellows, medical students, PA's

NEEDS ASSESSMENT

Recent advances in long-term heart rhythm monitoring and improvements in pacemaker detection of impending reflex syncope are changing the landscape of management options for this prevalent condition. Reflex syncope is a common referral for the practicing general cardiologist, and an awareness of the new tools available for diagnosis and management is necessary for current clinical practice.

LEARNING OBJECTIVES

At the conclusion of this activity, participants will be able to:

1. Review the niche for new rhythm monitoring technology in the diagnosis of syncope.
2. Discuss the latest in pacing algorithms designed for early detection and intervention in reflex syncope.
3. Review patient selection for advanced therapies.

DESIGNATION STATEMENT

The Yale School of Medicine designates this live activity for 1 AMA PRA Category 1 Credit(s)[™]. Physicians should only claim the credit commensurate with the extent of their participation in the activity.
