CIRA Presents:
Qualitative Research Discussion Group

Join CIRA for another discussion on the qualitative research process.

Presenter: S. Raquel Ramos, Rory Meyers College of Nursing, New York University

Title: “Formative and Technology-enabled Approaches to Inform Decision Making in Persons Living with or at Risk of HIV: Reflections on the Past to Guide the Future”

Friday, March 19, 2021
12:00 pm – 1:30 pm

Join by Zoom:

Qualitative Research Discussion Group (QRDG)

Overview

The goal of the Qualitative Research Discussion Group (QRDG) is to provide opportunities for individuals involved in qualitative or mixed-methods research to meet regularly to discuss the qualitative research process and potentially problem-solve issues that may arise when engaged in qualitative research. Discussion topics include, but are not limited to: logistics, data management, analysis, dissemination, role of the researcher, and ethics. It is intended as a venue for discussing research in progress and new or relevant literature on qualitative methods and practice as well as to create networking opportunities and foster research collaborations. CIRA’s Interdisciplinary Research Methods (IRM) Core Core member, Lauretta Grau, PhD, is coordinating the meetings. She can be reached at lauretta.grau@yale.edu.

Speaker Bio: S. Raquel Ramos, Rory Meyers College of Nursing, New York University

S. Raquel Ramos, is an assistant professor at New York University Rory Meyers College of Nursing. She has over a decade of direct-care experience in various settings, such as intensive care, cardiac cath lab, long-term care, LGBTQ+ community health, and clinical research.

Ramos's research examines how user-centered design and technology-enabled interventions can facilitate informed decision-making in sexual minority men of color living with HIV or at risk of HIV. She designs interventions that prioritize health-information needs from the perspectives of patients, providers, and non-clinical personnel. As a nurse investigator, her research falls under the realm of consumer health informatics, specifically focusing on user-centered design, preference, health literacy, and autonomy support as tools for enhancing informed decision-making.
