Announcements

Yale SPORE in Skin Cancer

I am very pleased to announce that the National Cancer Institute has renewed its funding of the Yale SPORE in Skin Cancer grant for an additional 5 years, and a total of \$12.5 million. Congratulations to Marcus Bosenberg and Harriet Kluger and the entire SPORE team on their accomplishment. We have seen exciting developments from the research funded through our SPORE in Skin Cancer over the last decade and are thrilled to be able to continue this important work with the support of the National Cancer Institute.

Smilow Breast Center Welcomes Tamara Carroll, MD

Dr. Tamara Carroll joins the Yale Department of Radiology and Biomedical Imaging from AdventHealth in Orlando, Florida where she worked as a Women's Imager. She is a graduate of Wesleyan University and Yale School of Medicine. Dr. Carroll completed her radiology residency at the University of Washington and a breast imaging fellowship at Yale. Her clinical interests include breast cancer screening and patient health literacy.

News Center

Dr. Edward Perry Joins VA Cancer Center

Dr. Michal Rose, Director of the VA Cancer Center, has announced the appointment of Edward Perry, MD to the Center. Dr. Perry joins the VA after completing a hematology/oncology fellowship at the University of Connecticut and a residency in internal medicine at the George Washington University. Prior to that, he was on the faculty of the Department of Psychiatry at Yale School of Medicine from 2001-2008. Dr. Perry's research interests are in psycho-oncology and supportive care.

YCC Biostatistics Shared Resource: Biostatistics and Bioinformatics Support

Yale Cancer Center's Biostatistics Shared Resource, directed by Dr. Shuangge Ma, offers a team of cancer biostatisticians and bioinformaticists who work collaboratively with YCC members to assist with research projects. The team works in conjunction with the Yale Center for Analytical Sciences (YCAS).

The shared resource provides biostatistics and bioinformatics support to YCC members, including research and clinical study design and analysis, biostatistics, sequencing pipeline and 'omics analyses, and grant and manuscript preparation. For more information on services and utilization, please visit our [website](#). Open office hours are also available each week in WWW 213 for biostatistics on Thursdays from 9am - 1pm and Fridays from 9am - 5pm, and for bioinformatics on Fridays from 1pm - 5pm.

Closer to Free

There's still time to register join us for the 8th annual Closer to Free Ride on Saturday, September 8th. There's a place for everyone - riders, volunteers, and supporters - every member of the Yale Cancer Center and Smilow Cancer Hospital community plays an important part in making the Ride a success. I look forward to seeing you all there!

Notables

Valentina Greco, PhD, has been appointed the inaugural **Carolyn Walch Slayman Professor of Genetics**. Dr. Greco is a member of Yale Cancer Center's Signal Transduction Research Program and focuses her research on understanding fundamental principles that sustain tissue regeneration.

Congratulations to **Eileen Holt, RN, CN III**, Smilow Radiation Oncology Hamden, who was the recipient of a **Daisy Award** earlier this month. The presentation was attended by Eileen's co-workers, Eileen's family members, and a patient's family who nominated her for the extraordinary care she provided to their loved one and their entire family! Thank you for your wonderful work, Eileen!

Lajos Pusztai, MD, DPhil, Professor of Medical Oncology and a member of the Genomics, Genetics, and Epigenetics Research Program, has been awarded a \$250,000 grant from the **Breast Cancer Research Foundation** to support his research project, *Characterization of intra-tumor heterogeneity and immune infiltration in breast cancer and its clinical implications*.

Elizabeth Claus, PhD, MD, Professor of Biostatistics, Director of Medical Research, Yale School of Public Health, and a member of Yale Cancer Center's Cancer Prevention and Control Research Program, has been named Chair of the **American Brain Tumor Association's "Partners in Patient Care Meeting"** in Boston on November 3.

[Read More >>](#)

Tanya Malak, Clinical Trials Team Manager for Leukemia Research in the Clinical Trials Office, often gets asked the question, "What are clinical trials exactly?"

Clinical trials are often a misunderstood area of cancer, especially in regards to the work that is done behind the scenes. Tanya is responsible for overseeing the leukemia clinical research team, which coordinates phase I, II, and III

trials from start up to activation, throughout the phase of the trial. They work to recruit patients and collect data points during the trial, but also work directly with patients to monitor for any side effects and see how they are tolerating the treatment regimen.

The team is responsible for overseeing about 25 trials that are currently enrolling patients, and a total of 40-50 trials that are in some phase of development. Tanya has been involved in clinical research for six years; the last year and a half spent exploring cancer therapies. "Leukemia is an area that is constantly changing and there is always something new to learn," commented Tanya. "Our team is committed to the mission of providing patients with access to cutting-edge therapies for hematologic malignancies. Working on early phase oncology clinical trials is incredibly exciting as many of the therapies we study may become standard of care later down the line. In my role, I have the benefit of not only conducting research, but also working with patients and seeing first-hand how these therapies may help improve quality of life."

The majority of the trials that Tanya works on are phase I trials, where getting information to the sponsor in a timely fashion is critical. Any serious adverse events need to be reported within 24 hours.

Rebecca Lilian, Assistant Director for Clinical Trial Operations, Clinical Research, commented, "Over the past year, the Leukemia team has grown significantly and Tanya
