

# Yale SCHOOL OF MEDICINE

## GENETICS DEPARTMENT SEMINAR SERIES

# Understanding human pluripotent stem cell states and their applications

The past decade has seen significant interest in the isolation of pluripotent stem cells corresponding to various stages of mammalian embryonic development. I will discuss recent insights into the naïve state of human pluripotency and our efforts to exploit its extraembryonic potential to model human placental development.

## **Dr. Thorold Theunissen, PhD**

Assistant Professor

Washington University School of Medicine in St. Louis

### **Host: Dr. Berna Sozen, PhD**

Assistant Professor

YSM Department of Genetics

**Tuesday, November 9, 2021**

11:30am - 12:30pm

**[Zoom Link](#)**

**pw: 473124**
