

EXECUTIVE MASTER OF PUBLIC HEALTH

Designed from the ground up for working professionals, the hybrid Executive MPH at the Yale School of Public Health is a two-year, part-time program that combines the convenience of online courses with on-campus leadership and management training: program designed for working professionals.

Cohort-Based Learning to Build Community & Public Health Leadership

Public health leadership requires collaboration across different backgrounds and perspectives. Through cohort-based learning, real-time discussions, and in-person intensives, our EMPH students develop and practice these skills with peers who are passionate about public health, while building personal and professional relationships to last a lifetime.

In-Person Leadership and Management Training on the Yale Campus

Three four-day leadership and management intensives on the Yale campus allow you to develop and practice key skill sets under the guidance of expert instructors, in collaboration with other members of your cohort.

Distinguished Faculty and Expert Practitioners

Yale's award-winning faculty teach alongside expert practitioners to provide our students with a broad range of perspectives and expertise.
