

## SEMINARS IN HUMAN AND TRANSLATIONAL IMMUNOLOGY

*Presented by*

**Yale School of Medicine, Human and Translational Immunology Program**

# “Supercharging the Immune System Against Cancer: Insights from iMOONSHOT”

**Rachel Perry, PhD**

**Assistant Professor of Internal Medicine (Endocrinology) and of Cellular & Molecular Physiology  
Yale School of Medicine**

**Tuesday, October 12, 2021 from 4-5 PM  
Seminar by Zoom**

**CME Activity Code: Text 28981 to 203-442-9435**

**Host: Dr. Marcus Bosenberg  
Course Directors: Dr. Carrie Lucas and Dr. Ellen Foxman**

*There is no corporate support for this activity. This activity is not supported by any educational grants.  
This course will fulfill the licensure requirement set forth by the State of Connecticut*

### **ACCREDITATION**

The Yale School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

### **TARGET AUDIENCE**

The target audience for the HTI Seminar Series comprises attending faculty, clinical and basic scientists, community physicians, nurses, residents, fellows, and students.

### **NEEDS ASSESSMENT**

The HTI Seminar Series seeks to review the scientific basis for choice of immunologically related therapeutic targets in various diseases, including organ-specific and systemic autoimmunity, allergy, transplant rejection, cancer, and infectious diseases. The goal is to help understand the rationale and mechanism underlying the major pharmacologic approaches for interventional immunology in current practice and review the data on the different therapeutic approaches in different specialties.

### **DESIGNATION STATEMENT**

The Yale School of Medicine designates this live activity for 1 *AMA PRA Category 1 Credit(s)*<sup>™</sup>. Physicians should only claim the credit commensurate with the extent of their participation in the activity.

### **LEARNING OBJECTIVES**

At the conclusion of this activity, participants will be able to:

1. Describe the current leading hypotheses regarding how metabolic changes enhance or impede anticancer immune function
2. Understand the arguments for and against the idea of tumor-immune cell substrate competition
3. Understand insights revealed by iMOONSHOT metabolic flux analysis of T cell substrate preference

### **FACULTY DISCLOSURES**

Rachel Perry: None  
Carrie Lucas: None  
Ellen Foxman: None

It is the policy of Yale School of Medicine, Continuing Medical Education, to ensure balance, independence, objectivity and scientific rigor in all its educational programs. All faculty participating as speakers in these programs are required to disclose any relevant financial relationship(s) they (or spouse or partner) have with a commercial interest that benefits the individual in any financial amount that has occurred within the past 12 months; and the opportunity to affect the content of CME about the products or services of the commercial interests. The Center for Continuing Medical Education will ensure that any conflicts of interest are resolved before the educational activity occurs.
