

NEW Online Certificate on Climate Change and Health

The Yale School of Public Health is pleased to offer an 18-week, online certificate program on climate change and health.

Experts from Yale School of Public Health and partner institutions will teach three six-week courses:

- Introduction to Climate Change and Health
- Climate Adaptation for Human Health
- Communicating Climate Change and Health

Public health professionals and other learners will develop a detailed understanding of the negative health impacts of climate change, learn to devise adaptation strategies to reduce these impacts, and be able to effectively communicate the health-related risks of climate change to the public and policymakers and to motivate positive changes in climate-related behaviors.

Visit the certificate website today for program details or to apply:

cchcert.yale.edu

This activity has been approved for *AMA PRA Category 1 Credit™* and it will be offered for all courses in the certificate.

Blend the convenience of working independently with real-time online interactions with faculty and peers:

- Weekly lectures by distinguished faculty
- Small group, moderated peer-to-peer discussions
- Office hours each week
- Learn side-by-side with other professionals addressing climate change and health
- State-of-the-art production and learning tools
