Year in Review
Tuberculosis

Samir Gautam, MD, PhD
Clinical Fellow
Yale School of Medicine

Luke Davis, MD
Associate Professor of Epidemiology, Microbial Diseases
Professor of Medicine, Pulmonary
Yale School of Medicine

Wednesday, May 15, 2019, 3-4 pm
Fitkin Amphitheatre

Moderator: Lloyd Friedman, MD

Tuberculosis is the leading infectious cause of death worldwide, claiming more than 4000 lives per day. To break the cycle of infection, the World Health Organization has prioritized the implementation of screening and treatment strategies for latent tuberculosis, as well as the development of novel vaccines. Recently, several impactful papers with practice-changing implications have been published in this field. It is imperative that pulmonologists acquaint themselves with updated recommendations for treatment of latent tuberculosis that derive from these studies and familiarize themselves with the basic principles and current research in tuberculosis vaccinology.

LEARNING OBJECTIVES
At the conclusion of this activity, participants will learn to:
1. Audience members should be able to recognize and explain the basic principles of tuberculosis immunity and vaccinology
2. Audience members should be able to interpret and describe the findings of recent studies on tuberculosis vaccines
3. Audience members should be able to implement evidence-based practices for treating latent tuberculosis infection

ACCREDITATION
The Yale School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

TARGET AUDIENCE
Attending physicians, house staff/fellows, medical students, nurses, physician assistants.

NEEDS ASSESSMENT
Tuberculosis is the leading infectious cause of death worldwide, claiming more than 4000 lives per day. To break the cycle of infection, the World Health Organization has prioritized the implementation of screening and treatment strategies for latent tuberculosis, as well as the development of novel vaccines. Recently, several impactful papers with practice-changing implications have been published in this field. It is imperative that pulmonologists acquaint themselves with updated recommendations for treatment of latent tuberculosis that derive from these studies and familiarize themselves with the basic principles and current research in tuberculosis vaccinology.

LEARNING OBJECTIVES
At the conclusion of this activity, participants will learn to:
1. Audience members should be able to recognize and explain the basic principles of tuberculosis immunity and vaccinology
2. Audience members should be able to interpret and describe the findings of recent studies on tuberculosis vaccines
3. Audience members should be able to implement evidence-based practices for treating latent tuberculosis infection

DESIGNATION STATEMENT
The Yale School of Medicine designates this live activity for 1 AMA PRA Category 1 Credit(s)™. Physicians should only claim the credit commensurate with the extent of their participation in the activity.

FACULTY DISCLOSURES
Richard Matthay, MD, Course Director – No conflicts of interest
Luke Davis, MD – No conflicts of interest
Samir Gautam, MD – No conflicts of interest

It is the policy of Yale School of Medicine, Continuing Medical Education, to ensure balance, independence, objectivity, and scientific rigor in all of its educational programs. All faculty participating as speakers in these programs are required to disclose any relevant financial relationship(s) they (or spouse or partner) have with a commercial interest that benefits the individual in any financial amount that has occurred within the past 12 months; and the opportunity to affect the content of CME about the products or services of the commercial interests. The Center for Continuing Medical Education will ensure that any conflicts of interest are resolved before the educational activity occurs.
