The following case study applies to questions 11-30

Ms. Smith is a 17-year-old non-restrained driver involved in a single car crash brought to the ED by EMS. She is awake and alert, and angry about crashing her new car. She sustained a laceration to her forehead. She has a noticeable smell of alcohol on her breath, and she reports drinking a six-pack of beer with her friends after class. She generally drinks 5 or 6 beers 2-3 times a week stating that it helps her with the stress in her life. Her c-spine x-ray is negative and her laceration has been repaired.

Please answer whether is it **T**RUE or **F**ALSE that each of the following statements/questions is something you would you say or do as an effective strategy to **PRODUCE CHANGES** in Ms. Smith's drinking patterns.

	TRUE1	FALSE2
11. The first step towards change is to admit you have a drinking	Т	F
problem		
12. Ask the patient permission to discuss his/her drinking.	Т	F
13. Your stress is directly related to your drinking.	Т	F
14. Convince the patient that there is in fact a connection between their	Т	F
drinking and the car crash.		
15. What if any connection is there between your drinking and the car	Т	F
crash?		
16. You should already know that drinking and driving is dangerous.	Т	F
17. Until you hit "rock bottom", it will be very hard for you to change	Т	F
your drinking.		
18. How ready are you to simply think about cutting down on your	Т	F
drinking?		
19. What makes you motivated to want to make a change?	Т	F
20. My recommendation is that you go to counseling.	Т	F
21. You really need to start going to AA meetings.	Т	F
22. You may never be able to drink again.	Т	F
23. Why aren't you less motivated to do something about your drinking?	Т	F
24. You need to immediately cut down to below risk drinking levels.	Т	F
25. I'm encouraging you to completely stop drinking.	Т	F
26. It's clear that you are becoming alcohol dependent.	Т	F
27. Negotiate a reduction of drinking even if the patient does not	Т	F
commit to below low-risk levels of alcohol use.
