Smilow Classical Hematology in Orange

Appointments and Referrals: 203-200-4363

As part of our Center of Excellence for Classical Hematology at Smilow Cancer Hospital in Orange, CT, our hematologists provide a full spectrum of highly specialized care to patients with non-malignant hematology disorders, and participate in research to advance treatment options. The types of disorders that we care for include thrombosis, anemia, bleeding and platelet disorders, and other hematological conditions and rare diseases. Our hematologists work closely with a specialized team of advanced practice providers and nurses, in addition to our colleagues in Laboratory and Transfusion Medicine, in order to provide a multidisciplinary clinical focus. Community outreach and education are key components of the program in order to improve awareness and understanding of non-cancer blood disorders and train the next generation of physicians, APPs, and nurses.
