

China Medical Board Biomedical Research Fellowship in China

The **CMB Biomedical Research Fellowship in China** is a training program for U.S. scholars from the health professions and biomedical sciences to spend up to a year at selected academic centers in China.

Applicants from all institutions and biomedical fields are welcome!

The fellowship includes:

- A stipend and research funds comparable to NIH fellowships
- One-week pre-departure orientation
- Co-mentorship from faculty at U.S. and partner Chinese institutions

Eligibility Criteria:

- Applicants must be US citizens
- Completed or will be in the final years of a doctoral degree in a relevant field (e.g., MD, PhD, DDS, PharmD, DVM, etc.) by the start of the CMB fellowship period
- Available to spend approximately one year at a research site in China
- A working knowledge of Chinese language is helpful, but not required

Unique opportunity:

- Join a cohort consisting of the next generation of research leaders
- Generate preliminary data for subsequent research grant or career development award applications
- Contribute to research manuscripts in top academic journals
- Receive logistical, practical, and scientific support in China

This program is administered by a consortium including Yale University, the University of Michigan, and the University of North Carolina.
