

SYNAPSES:

Seminars at Yale Neuroscience: Advanced PoStdoc Extramural Series

Tuesdays – 10:30 AM in Dome Room (SHM I500)

Date	Speaker	Host
Feb. 26, 2019	 Yvette Wong, PhD Northwestern University <i>"Mitochondria-lysosome contact sites in cellular homeostasis and neurodegeneration."</i>	Drago Milovanovic, PhD
March 26, 2019	 Jiannis Taxidis, PhD University of California, Los Angeles <i>"Representing the external and internal world: Emergence and stability of hippocampal sequences encoding odors and time."</i>	Katie Ferguson, PhD
April 30, 2019	 Michael Wells, PhD Broad Institute/Harvard University <i>"Accelerated production of human stem cell-derived neural cells for large-scale genetic screens and multiplexed transcriptomic analysis."</i>	Amber McCartney, PhD
May 28, 2019	 Tongfei Wang, PhD University of California, San Francisco <i>"Thermoregulation via temperature-dependent PGD2 production in mouse preoptic area."</i>	Quentin Perrenoud, PhD
June 11, 2019	 Meg Younger, PhD The Rockefeller University <i>"Processing human cues in the mosquito brain."</i>	Alicja Puscian, PhD
Sept. 10, 2019	 Kirstie Cummings, PhD Icahn School of Medicine at Mount Sinai <i>"Prefrontal somatostatin interneurons encode memory."</i>	Nour Al-muhtasib, PhD

Yale

Hosted by the Neuroscience Department and
Kavli Institute for Neuroscience at Yale
