Yale School of Medicine Symposium
This symposium will take place at Yale West Campus, 83 West Campus Drive, Building 800 / Conference Center, Orange, CT.

Symposium Schedule
10:00 AM Welcome and Introductions
Richard H. Mattson MD
10:10 AM Epilepsy Fellow’s Patient Case: Part I
Benjamin Tolchin MD, MS
Dennis D. Spencer MD

Learning Objectives
- Update their knowledge of new antiepileptic medications
- Apply the most recent imaging techniques in patients with epilepsy
- Make informed decisions about the use of cannabinoids in the treatment of refractory epilepsy
- Discuss the surgical treatment options for patients with epilepsy, including neurectomies
- Identify the indications and limitations of ICU-EEG monitoring for patients with status epilepticus
- Recognize common pitfalls in EEG interpretation
- Update their knowledge of treatment considerations for women with epilepsy
- Discuss the role of psychogenic nonepileptic spells
- Identify options for dietary therapy for children and adults with epilepsy

Participants will have the opportunity to participate in questions and answers during each session. The symposium is open to all physicians and allied health professionals with an interest in epilepsy. Attendance is free, but registration is required.

This activity has been planned and implemented in accordance with the Essential Areas and policies of ACCME and is subject to change. The activity is pending the approval of ACCME. This activity will provide participants with the tools to stay up-to-date on established therapies and recommended treatments and the actual care patients continue to have seizures, possibly partially due to the gap between established therapies and recommended treatments and the actual care patients receive. This activity will provide participants with the tools to stay up-to-date on new advances in the treatment of epilepsy and related disorders, and will increase participants’ awareness of emerging diagnostic and therapeutic options.

Participants will have the opportunity to participate in questions and answers during each session. The symposium is open to all physicians and allied health professionals with an interest in epilepsy. Attendance is free, but registration is required.
