

Elisabetta Ullu Memorial Lecture

Elisabetta was Professor of Medicine (Infectious Diseases) and of Cell Biology at the Yale School of Medicine. An intellectual titan and talented experimentalist, Elisabetta was one of the most inspiring scientists, mentors and teachers of our time. Her influence and impact on the field of parasitology was immeasurable, not only because of her expertise but, more importantly, because of her humanity. Deeply caring and compassionate, Elisabetta was a dedicated mentor to students and scientists at all levels. She was a tireless and outspoken advocate who supported the career development of numerous junior scientists. Her legacy includes both her unselfish mentorship and support of junior scientists, as well as her own considerable scientific discoveries.

From Protein Folding to Cognition: A Serendipitous Path of Discovery

Peter Walter, Ph.D.

Distinguished Professor of Biochemistry
and Biophysics, HHMI Investigator,
University of California at San Francisco

THURSDAY NOVEMBER 3 AT 4 PM

Harkness Auditorium | Free and Open to the Public | Reception to follow
