

YOU'RE INVITED

2019 ACS CAN CONNECTICUT POLICY FORUM

THE FUTURE OF CANCER CARE: THE ROLE OF BIOMARKERS IN ADVANCING PERSONALIZED MEDICINE

NOVEMBER 14, 2019

POND HOUSE CAFÉ | WEST HARTFORD, CT
8:00 AM - 10:00 AM

The Future of Cancer Care Forum will examine the current impact and future potential of biomarkers in cancer research, diagnosis and treatment and discuss advancements and barriers to new technological discoveries. The goal is to create a dialogue to analyze and discuss how biomarkers are helping to change the healthcare landscape-- particularly people living with cancer-- from a "one size-fits all" model to a more personalized approach where cancer and disease may be diagnosed earlier and treated using information contained within a patient's own genetic profile, offering the potential to reduce health care costs and significantly improve patient outcomes.

Speakers

Jairaj A. Puthenveetil, Ph.D., M.B.A. - Associate Director, Oncology Health Systems Bristol-Myers Squibb

Barbara Moehring - Director of Clinical Development and Medical Affairs Oncology at Boehringer Ingelheim

Daniel P. Petrylak, MD - Professor of Medicine (Medical Oncology) and of Urology; Co-Leader, Cancer Signaling Networks, Yale Cancer Center

Pratheesh Sathyan, Ph.D. - National Lead Medical Science Liaison, Foundation Medicine

Alpesh J. Amin, M.D. - Medical Director US Oncology Medical, Novartis

Moderator

State Representative Dr. William Petit (22nd District) - House Ranking Member, Public Health Committee
