"Laparoscopic Pelvic Anatomy - Prevention and **Management of Surgical Complications**"

There is no corporate support for this activity Course Director/Host: Lubna Pal, MBBS, FRCOG, MS, FACOG

Thursday, November 8, 2018, 4:00PM-5:00PM

Brady Auditorium, 310 Cedar St

LEARNING OBJECTIVES:

At the conclusion of this talk, the attendees will be able to:

- 1. Identify the anatomic structures of the female pelvis relevant to laparoscopic surgery Summarize the techniques necessary to prevent laparoscopic surgical complications
- 3. Discuss the various methods of managing operative complications of laparoscopic pelvic

NEEDS ASSESSMENT:

All gynecologists need a thorough and complete understanding of female pelvic anatomy in order to perform safe and effective surgery. Gynecologists need to be aware of techniques useful in preventing surgical complications. Gynecologists need to be able to recognize and then competently treat surgical complications in laparoscopic surgery.

TARGET AUDIENCE

ObGyn attending physicians, house staff/fellows, medical students, nurses, PA's, community Ob/Gyn's, residents, midwives, nurses and researchers.
