OB/GYN Grand Rounds

The Case for Non-Extirpative Treatments for Uterine Fibroids: A Review of Newer Fibroid Procedures

Kimberly A. Kho, MD, MPH
Director, Fellowship in Minimally Invasive Gynecologic Surgery
University of Texas Southwestern Medical Center

December 2, 2021
4:00-5:00PM ▪ Virtual

Program Goals:
1. To discuss the use of non-extirpative procedures for management of fibroids and fibroid-related symptoms.
2. To describe the tissue effects of RF ablation.
3. To synthesize the current outcomes data on RF ablation of fibroids; To discuss patient selection and procedural details.

Needs:
The emergence of new technologies for the treatment of uterine fibroids necessitates consideration of existing data to support their safety, comparative effectiveness and an understanding of the various devices, tissue effects, and outcomes both beneficial and adverse.

Target Audience: Ob/Gyn

Financial Disclosure Information:
Kimberly A. Kho, MD, MPH, faculty for this educational event, is research-site PI for ULTRA Registry-Hologic, Inc. All of the relevant financial relationships listed for these individuals have been mitigated.
