

YALE Ob/Gyn

2025 BRIEF

Yale SCHOOL OF MEDICINE

Obstetrics, Gynecology & Reproductive Sciences

“We continue to be recognized as a premier obstetrics and gynecology program, consistently ranking among the top in the country in both U.S. News & World Report and Newsweek listings.”

Numbers and rankings do not capture the entire story of Yale Ob/Gyn's success and impact, but they offer important insights into why and how we improve women's health worldwide.

We continue to be recognized as a premier obstetrics and gynecology program, consistently ranking among the top in the country in both *U.S. News & World Report* and *Newsweek* listings. Although these ratings are not perfect, they do influence where people receive care and the recruitment of physicians, surgeons, fellows, and residents.

Without exceptional faculty and the team that supports them, we would not be able to meet the increasing needs of patients and the evolving complexities of why they come to us—both in happy times and times filled with stress, fear, and pain.

We strategically added four new faculty members to the family in 2024 and have several additions in 2025.

Outstanding trainees also enhance Yale Ob/Gyn's reputation as a leader in community-based settings and cutting-edge academic medical centers. Physician-scientists and researchers make up the backbone of Ob/Gyn and reproductive innovation, and they are second to none here at Yale.

Special thanks to the following for help in compiling statistics:

Elvira Barbiero, Krista Davis, Colleen Goble, Rebecca Rowley, Madeleine Sparf, and Hugh Taylor

We work hard to regularly collaborate, teach, and move the dial by publishing and presenting hundreds of studies annually. And we have consistently ranked in the top 20 of the Blue Ridge medical research listings.

This all reflects Yale Ob/Gyn's carefully crafted three-pronged mission focused on clinical excellence, education, and research advancements. It influences everything we do and strive for. Each year brings its own set of uncertainties and challenges. What always gives me hope are the people who make up Yale Ob/Gyn. From physicians to administrative assistants, educators to accountants, residents to lab techs – you all demonstrate compassion, commitment, and resilience. That is why we are known for groundbreaking medicine and world-renowned research.
