Department of Molecular Biophysics and Biochemistry Departmental Colloquium

Zhao-Qing Luo, PhD
Department of Biological Sciences
Purdue University

Ubiquitination lessons taught by the bacterial pathogen Legionella pneumophila

The discovery and mechanism of an E1- E2-independent ubiquitination catalyzed by bacterial proteins and its regulation by factors from bacterial and host cells.

Monday, September 13, 2021

Presented via Zoom 91273388192
Full instructions in department email
4:00 Seminar

Host: Mark Hochstrasser

Supported by the Mrs. Hepsa Ely Silliman Memorial Fund
