

The Clinical Trials Working Group

Daniel Zelterman, PhD
Professor
Department of Biostatistics
Yale University

ABSTRACT

We have organized a working group to study biostatistical aspects of small clinical trial design and analysis. In this talk we will describe some of our previous work as well as some ongoing research. The work is frequently suggested as a result of our interactions with medical researchers conducting clinical trials at Yale. The problems we address are well motivated and often simple to describe. We welcome new members sit in with us and join the discussion.

**Group members: Drs. Daniel Zelterman, Wei Wei, Denise Esserman,
Veronika Shabanova and Michael Kane**

12:00 Noon, Tuesday, September 24, 2019
47 College Street, Room 106B

11:45 AM - Lunch served outside Room 106B
