This workshop raises awareness of why bias persists despite an individual's rejection of prejudiced ideas. Tools to reduce implicit bias are then presented with evidence for their effectiveness in increasing faculty diversity. Space is limited; preference will be given to faculty and postdoctoral fellows. For more info about Devine's research and workshop modules, please visit wff.yale.edu/event/bias-workshop

This event is sponsored by the Committee on the Status of Women in Medicine (SWIM), Women Faculty Forum (WFF), Minority Organization for Retention & Expansion (MORE), and YSM Office of Diversity, Equity, & Inclusion.
