Announcements

Kevin Billingsley, MD, Chief Medical Officer

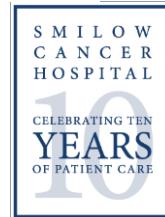

Please join me in welcoming Dr. Kevin Billingsley to Yale Cancer Center and Smilow Cancer Hospital this week. As our Chief Medical Officer, Dr. Billingsley is responsible for clinical cancer care across YCC, SCH, and our Care Centers as well as clinical program development for cancer services throughout Yale

New Haven Health. Among his many responsibilities, he will oversee quality and patient safety initiatives, evaluate and optimize our multidisciplinary team structure, assist with facilities and space planning, support our research mission, and interact and coordinate with Yale New Haven Hospital's clinical leadership structure.

Dr. Billingsley joined Yale from Oregon Health and Science University (OHSU) where he served as Medical Director of the OHSU Knight Cancer Institute, Chief of Surgical Oncology, and the Hedinger Professor of Surgical Oncology. He is an international leader in the clinical care and research of hepatobiliary cancers, and served as co-director of the Liver Tumor Program at OHSU. We will announce Meet & Greets

from the desk of
Charles S. Fuchs, MD, MPH
Director, Yale Cancer Center
and Physician-in-Chief
Smilow Cancer Hospital

**Yale

**Smilow Cancer
Hospital**

Yale CANCER CENTER
A Comprehensive Cancer Center Designated
by the National Cancer Institute

News Center

for you to stop in and introduce yourself to Dr. Billingsley later this month.

YCC's Collaborative Partnership with YCCI

Funded through an NIH Clinical and Translational Science Award (CTSA), the Yale Center for Clinical Investigation (YCCI) is in its 14th year at Yale School of Medicine and leads our clinical research efforts by streamlining research support activities for all clinical departments throughout the School. Yale Cancer Center's Clinical Trials Office (CTO) is closely aligned with YCCI and benefits from infrastructure support provided through YCCI's resources, including OnCore system support, budgeting, quality assurance and protocol monitoring, multicenter trial project management, education and training initiatives, community outreach and engagement, Medicare coverage analysis and clinical trial activation efforts. Additionally, YCCI administratively manages components of YCC's Comprehensive Cancer Support Grant, such as the Protocol Review Committee and Data and Safety Monitoring Committee. These efforts are successful due to the collaborative partnership between the YCC CTO and YCCI. The leadership of YCC is grateful for the collaboration between our CTO and YCCI and will continue to find ways to partner together to streamline our efforts and improve our processes in order to improve timelines to activation and responsiveness for our study participants.

Tobacco Treatment Program Expands Services

The Yale Tobacco Treatment Program has received a grant to test a referral from EPIC to SmokeFreeTXT, the National Cancer Institute's free tobacco texting program. With the help of the Epic Bridges and the Ambulatory teams, an e-referral option has been added to a new tobacco treatment Smartset for oncology providers to increase the number of oncology patients who are treated for tobacco use. With the Smartset, oncology providers can refer their patients to this texting program, in addition to referring patients for the Smilow Tobacco Treatment Program and ordering tobacco pharmacotherapies. A referral can also be placed by providers typing "Smokefree" into the Add Order box in EPIC.

Fighting cancer

SmokefreeTXT is a free, evidence-based text message tobacco intervention, developed as a component of the National Cancer Institute's larger Smokefree.gov initiative. Patients can use the program on their own. It removes the many barriers of in-person treatment. The 8-week program provides encouragement, advice, and tips to help smokers who are trying to quit. In the SmokefreeTXT program, users receive 3-5 messages per day and can also receive additional real-time quit support by texting one of SmokefreeTXT's keywords (e.g., CRAVE).

For more information, please contact Quitsmoking@ynhh.org or 203-688-1378.

Notables

Hongyu Zhao, PhD, Chair of the Department of Biostatistics and the Ira V. Hiscock Professor of Biostatistics and a member of Yale Cancer Center's Genetics Genomics, and Epigenetics Research Program, was recently presented the **Pao-Lu Hsu Prize** at the 11th International Chinese Statistical Association conference in Hangzhou, China.

The Genetics, Genomics, and Epigenetics Research Program welcomes Farren Isaacs, PhD.

Dr. Isaacs is an Associate Professor of Molecular, Cellular and Developmental Biology. His laboratory is focused on developing foundational genomic and biomolecular technologies to probe and enhance the understanding of natural biological systems. Their approach is designed to integrate biology, chemistry, and bioengineering through the construction of genes, networks and whole genomes alongside quantitative models to reveal

complex biological processes. In turn, they utilize these insights to program and evolve organisms with new biological function. With a background in bioengineering, Dr. Isaacs has training and expertise across diverse research areas, which include molecular biology, genomics, computational biology, and molecular engineering.

Gerald Shulman, MD, PhD, was recently appointed to the **Cancer Signaling Networks Research Program**. Dr. Shulman is a Professor of Medicine and Cellular Molecular Physiology. He has an exceptional record of achievement in pioneering new approaches for *in vivo* studies of metabolism, mainly in understanding insulin-resistant diabetes. He has a growing interest in understanding metabolic dysregulation in cancer, and is expanding his own work in this area. He will be an important contributor to the strategic Yale Cancer Center goal of understanding and therapeutically exploiting cancer metabolism.

Employee Profile: Jocelyn Walls

is available for download on iTunes through our podcast this week.

To fully recover, many patients will need the help of occupational and physical therapists following cancer treatment. Linda Grenus, OT, and Scott Capozza, PT, discuss the assistance they provide to our patients at Smilow Cancer Hospital, and provide resources to listeners on Yale Cancer Answers. Tune in online or download the podcast through iTunes.

[Read More >>](#)

Congratulations to Tara Sanft, MD, who has been appointed the inaugural Chief Patient Experience Officer for Smilow

When people learn that Jocelyn Walls is an Oncology Social Worker, their first reaction is that it must be upsetting to hear from cancer patients for a living, but since she started in oncology in 2004, Jocelyn has only ever found it to be rewarding and uplifting.

Currently the only Oncology Social Worker serving the adult population at the Smilow Cancer Hospital Care Center at Greenwich, Jocelyn works with all patients, however the largest population that she sees is breast cancer patients. The majority of patients are newly diagnosed or undergoing treatment, but Jocelyn has found there is a need for post-treatment support services as well and she offers a monthly post-treatment support group for breast cancer patients. She also worked to create a parent packet for patients with young children that provides them with resources and guidance on how to navigate the challenges of raising children while undergoing treatment for cancer.

"I try to keep myself educated on all treatments that patients may be receiving and the possible side effects. It helps me to know ahead of time what physical challenges they will face during treatment and how that may impact them emotionally. When I meet with a patient I try to keep an open mind, because they are always surprising me with a new perspective or challenge I wasn't aware of," said Jocelyn.

Bonnie Indeck, LCSW, Manager of Oncology Social Work at Smilow Cancer Hospital, commented, "Jocelyn is an asset to oncology social work. She is clinically excellent, warm, and compassionate. It is so good that the patients in Greenwich have Jocelyn on their side, counseling, supporting, and guiding them, to enable them to manage the cancer trajectory with

Cancer Hospital. In this new role, Dr. Sanft will work to continue to build on our dedicated patient- and family-centered environment at Smilow Cancer Hospital and will also focus on the provider experience to foster a culture of wellness.

**Dr. Tara
Sanft**

**Chief Patient
Experience
Officer**

More than half of adults with Sickle Cell Disease (SCD) develop chronic pain, which is associated with higher levels of opioid use, worse clinical outcomes, and decreased quality of life.

Previously, it was thought that their pain was only nociceptive pain, or pain caused by tissue damage or inflammation, but a recent Yale study found that people with SCD can also have neuropathic pain, or pain due to dysfunctional peripheral or central nerves.

"The goal of these findings is to help guide future research attempting to better target therapy choices for SCD," said Susanna Curtis, M.D., a postdoctoral fellow at YCC and first author on the study. "Now that we have multiple approved therapies for this disease, we need more information to better guide therapy selection."

more ease. It is a pleasure to work with Jocelyn - and I am so glad she is on our team!"

YCC #OOTB Thanks Trisha Burrello

YCC #OUTOFTHEBLUETHANKS recently recognized Trisha Burrello, a Clinical Trials Team Manager in our Clinical Trials Office. Recently, when data on a trial needed to be urgently updated, Trisha's effort to make this happen immediately was commendable. Thank you, Trisha-your continued support and hard work is appreciated!

Yale Cancer Center's #OOTBTHANKS program is a staff recognition initiative to show appreciation to employees who have exemplified an above-and-beyond effort or an outstanding contribution to the team. All nominations should be submitted to the Director's Office c/o Anna Raso.
