

A Legacy of Caring, a Passion for Excellence

Yale Pathology Labs

*When timely, accurate results matter most,
Yale Pathology Labs has a solution.*

COVID-19 Molecular Testing & Whole Viral Genome Sequencing in a CLIA Certified Lab

Yale Pathology Labs are leaders in COVID-19 (SARS-CoV-2) testing. Since the onset of the pandemic, through today and into the future, Yale Pathology Labs has and will continue to offer leading-edge technologies.

Clients include large universities, private companies, and professional athletic teams.

**"Our company has benefited from the flexibility, rapidity and fluidity of your testing program. Our introduction to Yale Pathology Labs has been a blessing! We simply would not have rebounded and gotten through this horrific time without the Yale Pathology Labs team."
John W. Adams, CEO & Founder,
Cametoid Technologies**

SARS-CoV-2 Genome Sequencing

- Sequencing available for both nasal and saliva samples
- Rapid turnaround time
- Laboratory Developed Test (LDT) in CLIA certified lab
- Variant detection sequencing by whole genome analysis
- Identified variants/lineage shared with client in standardized report

Gold-standard PCR Testing for SARS-CoV-2

Nasal Swab

- Anterior nasal and nasopharyngeal
- All supplies provided

Saliva

- First lab in CT to offer FDA EUA approved Saliva based PCR test; September 2020
- Performed the clinical validation for the FDA EUA; approved August 2020
- Non-invasive, easy to self-collect
- All supplies provided

Why choose Yale Pathology Labs?

- Dedicated Outreach Service Team
- 24-48 hour turn around for PCR tests
- All positive cases called to client immediately
- Highest standards of quality control and safety; all low positive cases repeated
- Web-based, ordering and reporting portal
