### Learning Objectives

Participants who attend this conference will be able to:

- Assess the efficacy and safety of currently available pharmacological treatments
- Assess the role of various treatment options in challenging situations, specifically bipolar depression and late-life depression
- Evaluate evidence-based treatment algorithms and rating scales
- Identify future developments in psychopharmacology and clinical trial options
- Describe state of the art data on the role of current psychotropic medications and medical devices in the treatment of serious mood disorders
- Apply rational prescribing practices in keeping with guidelines released by the American Psychiatric Association and large scale real-world clinical outcome studies
- Identify future developments in psychopharmacology which may impact practice
- State the role of various psychopharmacological, brain stimulation and psychosocial treatments in challenging situations

Subject to change
