

Does your child have asthma?

Millions of children suffer with asthma. Please join Yale and the Mayo Clinic in studying air quality and asthma in Olmsted County.

Olmsted County Minnesota Air Quality (OMAQ) Project

If you have a **5 to 17 year old child with asthma**, you may be eligible to participate in a study designed to look at the effect of air quality on childhood asthma severity. The study involves a brief phone screening, sampling of your home's indoor and outdoor air for a two-week period in the winter and again in the summer, and collection of information on your child's asthma symptoms and medication use. ***You will receive a total of \$50 in pre-paid gift cards if you complete both monitoring periods.***

To learn more or to see if you are eligible, contact (203) 737-2530 or email OMAQ@yale.edu. Visit our website for more information at cppee.yale.edu/omaq.aspx.

Conducted by the Yale School of Public Health and the Asthma Research Unit of Mayo Clinic. Funded by Marcia T. Kreyling Career Development Award in Pediatric and Neonatal Research, Mayo Clinic. HIC # 2000023884 | Mayo IRB #18-003033
