*Special Seminar*

Wednesday, December 18, 2019

12:00-1:00pm (lunch provided)

105 LEPH, 60 College Street

**“Real-World Adoption, Utilization, and  
Disparities in Emerging Cancer Care  
Technology”**

*presented by*

**Michaela Dinan, PhD**

Associate Professor

Population Health Sciences

Duke University School of Medicine

Dr. Dinan is a health services researcher with a focus on emerging medical technology in cancer care. She is an NIH funded investigator who has conducted extensive work in breast, kidney, and other cancers examining emerging technologies and their associated disparities in utilization, outcomes and costs. Dr. Dinan has expertise in both secondary data analysis and clinical registry methodologies. She holds appointments in Duke University's Department of Population Health Sciences, the Division of Medical Oncology, and the Duke Cancer Institute.
