

 Yale Radiology and Biomedical Imaging  Title: Time off Clinical service for Grant Funded research less than 10% for Faculty on C-track	SOP 014.b	Effective Date: 2/6/2022
	Version 1	RAD Mission: / Research
Prepared By: David Madoff		Date: 2/6/2022
Management Approval: Rob Goodman, MD		Date: 2/6/2022

### 1.0 **Purpose**

This SOP is intended to define how grant funded research % effort is applied to clinical effort for faculty on C-track.

### 2.0 **Scope**

C-track faculty may be awarded research % effort as part of individual or collaborative grant awards. This research effort may be used to reduce clinical % effort. This SOP applies to both self-initiated and industry grants.

### 3.0 **Materials**

None

### 4.0 **Procedures:**

4.1 If a faculty member secures grant funding % effort, this will be used in conjunction with departmentally funded % non-clinical effort.

4.2 C Track:

Any % effort beyond 2.5% will be applied towards a reduction in clinical % effort.

4.2.1 For example,

- If a C track faculty member (with 5% departmentally funded non-clinical effort) receives 2% research effort, their clinical % effort will be unchanged.

- If a C track faculty member (with 5% departmentally funded non-clinical effort) receives 3% research effort, their clinical effort will be reduced by 0.5%.

4.3 The first 2.5% will go to YDR to offset existing non-clinical department support.
