

BE THE MATCH DONOR DRIVE SEPTEMBER 11, 2019

Thor,
Sickle Cell Patient

Join the registry to save a life!

Did you know that a Marrow or Blood Stem Cell Transplant is the only known cure for Sickle Cell Disease?

Thousands of patients with blood cancers and diseases could be cured with a blood stem cell donation from a genetically matched donor.

The registry is now over 20 million individuals but African American/Black patients only have a 23% chance of finding a match. Come learn how you can be the cure. Registration takes 5-10 minutes.

Can't make it?

DATE Wednesday, September 11th

TIME 10am - 2pm

LOCATION Yale New Haven Hospital - Atrium Cafeteria
20 York Street, New Haven CT
06510
